I am a postdoctoral fellow at Saarland University, focusing on AI to support marginalized communities in the Global South. My research focus is Human-Computer Interaction (HCI) and Information Technology and Development (ICTD). I finished my PhD at Carnegie Mellon University involved designing and deploying a chatbot for teacher professional development in Côte d'Ivoire, impacting over 400 teachers and over 10,000 rural students. Besides my thesis, I have worked on projects in Rwanda, the US, Macau, Afghanistan, Germany, India and South Africa with publications in top tier HCI venues like CHI, COMPASS, ICTD, and PDC. I have secured over \$200,000 in grants, including a Gates Foundation award and a fellowship during my PhD. I have co-led *HCI Across Borders*, a community of global researchers withing HCI by conducting workshops at CHI for over 6 years, mentored 25+ students and reviewed 80+ HCI papers.
